PROJECTS

Disease Prediction & Recommendation System : Built an ML-based website that predicts diseases from user symptoms and suggests medications, precautions, diets, and lifestyle tips. Applied data preprocessing and machine learning models for accurate health insights.

Travel Planner : Built a travel booking platform enabling users to connect with guides, book hotels via Booking.com, and plan trips using predefined itineraries.

Podcast Platform : Built a platform where users can upload audio/video podcasts and organize them into playlists; others can stream them anytime. Implemented media upload, playlist creation, and streaming functionality using basic web technologies.
